

Yale University,  
August 25, 1947.

Dear Dr. Brink,

Having slept on the matter, and come to a conclusion while we were still in Madison, it seems best to write to you now, rather than telegraph later. I have decided, of course, to accept the offer by the Department of Genetics of the post of assistant professor, for research on microorganisms, notwithstanding the unavoidable delays in setting up a suitable laboratory.

An item of equipment which I forgot to mention as an early requirement is a third incubator, capacity  $\frac{1}{3}$  -  $\frac{1}{4}$  of the other two, which can be adjusted in the range  $40 - 50^\circ$  ( $\pm 1.5^\circ$ ). Dimensions ca.  $12 \times 18 \times 18$ " or that order would be fine.  
h. w. d.

Subject to further communication, we hope to return about the 15 - 20 September. Our many thanks for your friendly hospitality.

Yours sincerely,

Joshua Lederberg.
